## ColourPrint HiQ

### High Quality Digital Inkjet Modules

ColourPrint HiQ

**Increase your profitability by enabling short run or even personalised labels and packaging.**

**Turn a conventional press digital at a fraction of the cost of a digital press.**

Ideal for high quality late stage label and packaging customisation. As with all IJ digital modules, this unit can be integrated onto most flexo presses with no more difficulty than existing analogue technology.

Using the latest high quality print heads from Konica Minolta, the ColourPrint HiQ can achieve the high standards of print quality, reliability and longevity that customers have come to expect from IJ at remarkable speeds.

The ColourPrint HiQ uses the small drop, high resolution KM1800iSHC print heads to give an apparent resolution of over 1000 dpi at over 60m/min. The small 3.5pl drops and 600dpi native resolution produce much more refined print results especially for applications such as cosmetics labels and packaging.
